

FLOATING WIND JOINT INDUSTRY PROGRAMME S3P2

Clarification Question Responses

Resilience of mooring systems exposed to fishing (RSMF)

May 2024

#	Type	Question	Response
1	Generic	Does the expected value \pm £80K exclude VAT?	Yes, the ~80K excludes VAT
2	Generic	Is the contract proposed to be Lump Sum or reimbursable?	Payments are made after each work package is reviewed and approved by our industrial partners. This is typically just under a month after receiving a deliverable for review.
	Project specific	How will the bids price weighting be scored - will the proposals be ranked according to price and higher price bids eliminated?	Scoring weighting is found in the tender description. Pricing is only a part of the scoring. Price is not the dominant factor.
	Project specific	Regarding WP1 "Understand applicability between mooring systems and fishing practices" – could you provide some clarification as to the expectations of how the Carbon Trust would like this to be reported, perhaps with an example?	The focus of this project is to investigate the potential damage/risk to mooring systems from varying types of fishing. The damage risk will be very different for chain and synthetic rope. What is the component risk on the mooring system for varying types of fishing activities?
