

Question No.	Question	Response
1	For these projects, can we use personnel from offices outside of the UK?	This is permitted. The bidder should note that all costs must still be converted to GBP as per Section 3.
2	Is there a possibility for the JIP to collect and provide anonymized data associated to the failures of cabling and according to a questionnaire developed and provided by us?	There may be an opportunity for the JIP to collect and provide data associated to failures. The bidder should propose sources and methods of obtaining information within their response with the assumption that no information can be provided by the JIP. Where a bidder can provide clear confidence in information available to them, this will be seen as an advantage to the JIP.
3	Is there a restriction for the type of party which can lead a consortium for this tender?	There is no restriction on the type of party which can lead a consortium. Any conflicts of interest should be highlighted where applicable.
4	Is there a minimum or maximum size of funding set for tender?	The estimated project budget defined in Section 5.1. This value sets a baseline to define the estimated level of work required for the project; however, the contractor may propose above or below this amount with justification but should try and aim for the budget defined.
