Offshore Wind Accelerator:

OWA Stage IV Year 4 Idealised Mega-Cluster Modelling (IMC) Project

Clarification Questions

#	Question	Response
1	Will the OWA Partners provide operational / measured data, or is this expected from the bidder?	The focus of the project is wind farms and clusters significantly larger than those which currently exist. As such, there are no validation data available from the OWA Partners. However, if bidders can identify a purpose for using data from current wind farms, and can make these data available, they are welcome to propose this.
